

WHY FOTCOH?

Your generosity can provide healthcare and hope to the people of Haiti.

1 ESSENTIAL

FOTCOH operates in a remote and impoverished area of Haiti with no affordable access to healthcare to provide essentials such as:

- ✓ Primary, preventative, and urgent healthcare
- ✓ Sanitation and hygiene support and education
- ✓ Focus on women's health, children's health, and nutrition

2 EXPERT

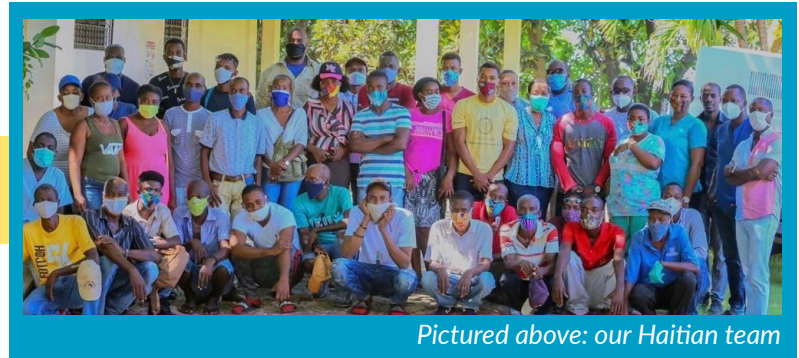

After 30 years of serving Southeast Haiti, FOTCOH has become known and trusted for assembling:

- ✓ Qualified Haitian providers delivering healthcare
- ✓ Our own clinic and grounds in Southeast Haiti
- ✓ Proven systems and technologies that continue saving lives, overseen by our U.S. providers

3 EMPOWERING

Haitian doctors and nurses render our services, assisted by a Haitian director and staff of 50 employed by FOTCOH.

Pictured above: our Haitian team

4 EFFECTIVE

Our ability to manage chronic health conditions (beyond just treating acute issues), when combined with our health and hygiene education, child nutrition, and clean water programs, enables us to achieve "population health management" to a degree we believe unique to much of Haiti.

5 EFFICIENT

Our humble budget delivers a big impact. How?

- ✓ U.S. expert volunteer providers plan services and review outcomes
- ✓ Volunteers who are active in finance, facilities, administration, and fundraising
- ✓ A local team committed to continuing our work despite natural disasters and unrest

6 ENRICHING

Communities we serve call our clinic "Kay lavi," which means "House of Life."

No people are more challenged by their circumstances, and none are more grateful. We teach the Haitians about health, and they teach us about life.

Thank you for supporting Friends of the Children of Haiti's work!
